

Direct Edge Manufacturing provides an innovative one-stop shop for sheet metal manufacturing and associated components, serving the defence, mining, transport, medical, marine, industrial, agriculture and electrical sectors.

Modern CNC technology delivers precise, cost-effective solutions with a certificate of conformance. With adaptable production capability, we add value and drive competitive advantage into your supply chain.

Location: South Burnie, Tasmania, Australia
Founded: 1987
Ownership: Privately owned Australian company

COMPETITIVE DISCRIMINATORS

- Australian owned and operated, supplying high-quality Australian-made products worldwide
- Full service under one roof, from receipt of order to dispatch: design, programming, cutting, folding, welding, finishing, inspection and assembly
- Low to high-volume production
- Latest CNC technology for reduced lead times and repeatable precision
- Finishes including powder coating, wet painting, electropolishing and engraving
- Certificate of conformance from Romer Absolute Arm and InspecVision inspection systems
- Dedicated R&D and continuous improvement team
- International Welding Engineer, Specialist and Inspector (IWE, IWS, IWI) on site, with welding certified to ISO 3834-2 and DIN 2303 Q2 BK1 for military products

PRODUCTS / CAPABILITIES

- Fully integrated ERP system controlling quality, flow, product identification and resource allocation
- Mild steel, stainless steel, aluminium, galvanised steel, titanium, copper, brass, timber, acrylics, polyethylene, polycarbonate, aluminium composite and rubber
- Components for above-ground and underground mining equipment
- Components for agriculture and marine industries
- Emergency vehicle cabinet fabrication
- Design and manufacture of aftermarket machinery guarding
- Stainless steel staircases and balustrades
- Signage solutions
- Food-grade stainless steel parts and components
- Design and manufacture of electrical and control cabinets
- Locomotive and rail components and assemblies
- Stainless steel sinks, benches and cabinets
- Components for industrial road sweepers

HIGHLIGHTS

- Founded in 1987, with more than 35 years in sheet metal manufacturing
- ISO triple certification: quality (ISO 9001), environment (ISO 14001) and work health & safety (ISO 45001)
- Welding certification to ISO 3834-2 and DIN 2303 Q2 BK1
- Supplier to the Land 400 Phase 2 program (BOXER CRV Early Capability Delivery)

ISO 3834-2 fusion welding (DVS ZERT)
DIN 2303 Q2 BK1 military products
(GSI SLV Hannover)

VALUE PROPOSITION

Direct Edge Manufacturing provides an innovative one-stop shop for sheet metal manufacturing and associated components. We offer design and drafting, prototyping, production from small batches to high volumes, quality assurance and inspection, final assembly and surface finishing, as demonstrated with clients such as CAT, Mader International, Taylor Brothers, SERS, Elphinstone Group, Sewell Sweepers, Levitator, Codan Ltd, Marand, Rheinmetall and VEC Civil Construction. We supply ready-to-assemble components to any product line and are a supply chain partner for you.

Through triple-certified ISO systems, Direct Edge has reduced its environmental footprint, minimised work health and safety risk and invested heavily in continuous improvement, reducing lead times and allowing us to move easily between low and high-volume production. Our Trumpf CNC machinery delivers precise, cost-effective solutions, with a certificate of conformance from our Romer Absolute Arm 7325 metrology system.

Our welding is certified to ISO 3834-2 and DIN 2303 Q2 BK1, coordinated and inspected on site by our International Welding Engineer (IWE), International Welding Specialist (IWS) and International Welding Inspector (IWI), with welder qualifications to Australian and international standards.

With modern technology and adaptable production capability, Direct Edge Manufacturing is in the position to add value and drive competitive advantage into your supply chain.
